

Cash Nut!

Nairobi Saturday February 9, 2019

Our motor-ing buddy Peter Kamwaro knows. But NTSA officials have absolutely no idea that the model on the left cannot be in the KAV series.

While the Chinese are still around, can they use leftover construction material to build us a roller coaster park?

The cashew tree is a native of Brazil and was introduced to the East African coast by the Portuguese in the 16th century. The name derives from acajú, a Tupian word from South America.

The Portuguese dropped the 'a' to say 'caju'. We turned that into 'mkanju' though it is more popular here as 'korosho'. There was once a vibrant cashew nut industry in Kenya. It got messed up by politics and corrupt upcountry executives. It is now a crisis in Tanzania as well.

We have to say Farewell to my fellow Kiboswan and schoolmate of my senior relative Ike Okoni. His immense contribution to our music heritage and international recognition shall remain an eternal achievement. A little eccentric, he was different and that is what made him a oneer.

Uhuru's order to procure material for his cops' new blue uniforms has derailed fat cats who had lined up deals in Guangzhou.

Abdication or smart move?

Smart move. These ministers were turning into pure manambas working for forces outside the cabinet. Feeling unsubsordinated by his own ministers, Uhuru hauled in Matiangi. We think it's a great move. But it might create a malignant adjunct...

In other terms...

It is not surprising that Kenya county governors want limitless office terms. They're made up of the same brain sludge of African leaders. The reason Al Sisi and Mnangagwa kicked out their bosses was because they too were aging and wanted a chance to rule for ever as well.
